Strong NNE winds Wednesday expected along with rough seas

Threat time: 16:00 UTC Wednesday (10AM CST Wednesday) - 5:00 UTC Thursday (11PM CST Wednesday)

Primary Impacts:

Winds: NNE 20-30 knots

Gusts: Exceeding 25 knots

Seas: Near Shore: 5-7 feet

Deep Water: 8-11 feet

A broad low pressure system is forecast to develop in the south central Gulf early this week. As it develops, northerly winds on its west side are expected to increase to strong to near-gale speeds, with gale-force gusts. Seas are expected to increase as well, with seas expected to reach 8-11 feet during the watch period. The low should move on to the east, and conditions are expected to improve rapidly Wednesday night and early Thursday.

An update will be issued around 16:00 UTC Tuesday.
